

# Piston Return Reservoir

The Piston Return Reservoir can reduce air cannon compressed air use by half, resulting in less demand on plant air compressors, increased force output and a fast return on investment.

## Increased Force Output

The Piston Return Reservoir retains maximum peak force output with a shorter refill cycle time.

## Significant Air Savings

Utilizing the reservoir, a 50% compressed air savings is actualized - with a higher operating pressure.

## Upgrade Performance

Retrofit onto your existing Martin® XHV cannon with Tornado exhaust valve.

**Piston Return Reservoir** provides maximum peak force output with significantly less refill cycle time.

Item	Part Number
Canister with Tornado exhaust valve	37733-C
Canister only	38351
